HEALTH OF MANKIND

W. H. le Riche

This is a comprehensive survey course on the problems affecting the health of mankind in global terms. It will discuss the situation as related to human ecology, with appropriate reference not only to the control of infectious diseases, but of all disease. Special importance will be attached to environmental factors in human disease such as air, water and land pollution, and psychopathological problems such as drug addiction.

It is offered for the general public and for those in the health professions, such as nurses and health inspectors who wish to broaden their horizons. It will also be of interest to university students who wish to know more about diseases as a world phenomenon.

Texts: (1) G. Wolstenholme and M. O'Connor, eds., **Health of Mankind**, J. & A. Churchill (London), 1967.
(2) W. H. le Riche, J. Milner, **Epidemiology as Medical Ecology**, J. & A. Churchill (London), 1970.

Time: Mondays, 7:00-9:00 p.m., October 5 to December 14; January 11 to March 15/71 (No class October 12)

Place: Victoria College, New Academic Building

Fee: \$70.00 — 20 sessions
